LANGUAGES

Bengali — Native

English — Professional working proficiency

INTERESTS

Independent product and web application development, system architecture, UI/UX for business tools. A keen interest in coding and making new ideas and creative tools for a user who wants to make his/her work perfect at ease.

EDUCATION

Bachelor of Laws(LL.B) **2017**

BGC Trust University Bangladesh

PROFESSIONAL SUMMARY

Full-stack web developer with 5 years of experience designing, building, and shipping complete, production-ready applications end to end. Specializes in turning real business workflows — retail, hospitality, education and inventory — into clean, maintainable web app built with Django, Flask, PyQt5 and JavaScript. Comfortable owning a product from data model through UI to final, buyer-ready packaging.

EXPERIENCE

Freelance Software Developer & Marketplace Author

2021 — Present

Independent — Remote / Bangladesh

- Designed and built full-stack web and desktop applications end to end, from database schema to finished UI, for direct clients and marketplace buyers.
- Delivered management systems for retail (shop & stock), hospitality (hotel & restaurant), and education (school) sectors, each with dashboards, reporting and role-based access.
- Built and shipped a multi-vendor marketplace site handling listings, orders and payments.
- Packaged products for public marketplace resale: clean env-based configuration, buyer-facing documentation and install guides.
- Maintained a consistent, modular codebase across Python (Django, Flask), PyQt5 desktop tools, and JavaScript front ends.

KEY PROJECTS

Marketplace Site

Multi-vendor marketplace web application covering product listings, cart, checkout and order management.

Shop Management System

Point-of-sale and inventory system for retail shops, with sales tracking, stock alerts and reporting.

School Management System

Student, teacher, class and attendance management with results/report-card generation for schools.

Hotel Management System

Room booking, availability calendar, and reservation workflow for small to mid-size hotels.

Restaurant Management System

Table and order management with kitchen ticketing, billing and daily sales reporting.

Stock Management System

Inventory tracking across products, suppliers and warehouses with low-stock alerts and audit history.

Developer Dashboard Management

All projects, clients, marketplace project's and info of direct clients in one place.
